

Vision

*The vision for the VINP transportation system in 2030 is for a **safe and sustainable multimodal system** that **efficiently** provides **mobility** and **access** for all. The system will be systematically **planned through collaboration and cooperation from all members of the St. John community** in order to support the **economy** and enhance **livability**.*

Goals

1. Reduce parking demand.
2. Establish scheduled transportation service.
3. Improve safety.
4. Improve bicycle and pedestrian facilities.
5. Improve wayfinding and traffic signage and post VITRAN schedules.
6. Manage Park overlooks/scenic pull-offs.
7. Provide for alternative-fueled vehicles.
8. Be accessible for physically-challenged people.
9. Reduce visitor reliance on rental cars for mobility and access.
10. Improve visitor experience and customer service.
11. Enable people to pre-plan their trip.
12. Address sediment control from unpaved roads.
13. Improve mobility and accessibility within the Park.
